YANNI ABI

Web Developer

India | +91 90369 27671 | yanni.abi@gmail.com | yanni-abi-john | My portfolio

SUMMARY

Experienced Technology Consultant transitioning to a dynamic role as a Web Developer. Proficient at diagnosing a wide range of hardware and software solution-related issues, and now applying these skills to create exceptional web solutions. An excellent team player with a strong focus on client and stakeholder interactions.

WORK EXPERIENCE

Lit Infotech Ltd. | United Kingdom

Web Developer (Remote - Part time)   June 2023 to Present

- Design and implement user interfaces using React.js for web applications.
- Create reusable and modular React components to enhance code maintainability and scalability.
- Implement state management solutions, such as Redux, to manage the state of complex applications efficiently.
- Utilize CSS frameworks like Bootstrap for consistent styling.
- Write clean, maintainable code following industry best practices and coding standards.
- Use version control systems, such as Git, to track changes and collaborate effectively with other team members.
- Address and fix issues related to browser-specific rendering.
- Identify and implement performance optimizations for front-end code, such as lazy loading, code splitting, and image optimization.

Hewlett-Packard Enterprise | India

Technology Consultant - Emerging Technologies   August 2022 to July 2023

- Serve as a subject matter expert in Linux operations, providing L3 support for complex technical issues.
- Lead troubleshooting efforts, identifying and resolving escalated Linux-related incidents.
- Architect, deploy, and maintain container orchestration platforms, including RedHat OpenShift, Suse Rancher, Canonical Kubernetes, HPE Ezmeral Runtime Enterprise, and Vanilla Kubernetes clusters.
- Plan and execute platform upgrades, ensuring minimal impact on production environments.
- Conduct performance analysis and tuning of Kubernetes clusters to optimize resource utilization.
- Implement and enforce security best practices for containerized environments.
- Ensure high availability of applications and services in the event of failures.
- Create and maintain detailed documentation for configurations, procedures, and best practices.
- Continuously evaluate and propose improvements to enhance the efficiency and effectiveness of Kubernetes operations.
- Engage with customers to understand their requirements and provide expert guidance.

Hewlett-Packard Enterprise | India

CIN Specialist   January 2022 to July 2022

- Design and architect converged infrastructure networking solutions based on HPE technologies to meet specific client requirements.
- Integrate networking components into converged infrastructure solutions, ensuring seamless interoperability with servers, storage, and virtualization platforms.
- Implement network virtualization solutions, such as HPE Virtual Connect, to enhance flexibility and scalability within converged infrastructure environments.
- Implement and maintain network security measures, including firewalls, intrusion detection/prevention systems, and access controls.
- Maintain comprehensive documentation of network designs, configurations, and troubleshooting procedures.

Netconnect Global Pvt Ltd. | India

Technical Solutions Consultant   June 2019 to December 2021

- Diagnose and resolve hardware and software issues on HPE Industrial Standard Servers promptly.
- Install, configure, and deploy HPE servers, chassis, and pass-through modules.
- Manage firmware and software updates for servers to maintain security and optimize performance.

TeamLease / Client: HP Inc. | India

Technical Support Engineer   June 2017 to May 2019

- Diagnose and resolve hardware and software issues on desktops, laptops, mobile workstations, and all-in-one PCs.

E D U C A T I O N

Kristu Jayanti College | Bangalore, India

Bachelor in Computer Applications   June 2014 to May 2017

L A N G U A G E S & T E C H N O L O G I E S

Languages/Frameworks: HTML, CSS, JavaScript, jQuery, React.js, Express.js, Node.js, MongoDB, SQL, Python

Tools: VS code, Eclipse, Atom, MobaXterm, Microsoft SQL Server

Technologies/Platforms: RedHat OpenShift, HPE Ezmeral Runtime, Suse Rancher, Vanilla Kubernetes
